CIPHANDS™

Chlorhexidine Gluconate & Ethanol Antiseptic Solution
for Hand Hygiene

Topical Antiseptic Solution
with Emollient

Easy to use handrub effective
against bacteria including Tubercule
bacillus, fungi, viruses incl. HBV &
HIV Virus.

Ciphands Professional contains 2 Antiseptic agents:
Chlorhexidine Gluconate (2.5% v/v) and Ethanol (70%). Both
constituents are IP grade, and hence superior to other products
that have ingredients that do not confirm to IP standards.

Alcohol and chlorhexidine both are powerful bactericidal agents
against a wide range of bacteria, viruses and other microbes.
Chlorhexidine has significant residual activity. Addition of Chlorhexidine
to alcohol based preparations results in significantly greater residual
activity than alcohol alone.

MRP ₹ 249.00

Qty: 500ml
